Listings Growth by Room Type (2008 - 2021)

Market Summary

Airbnb grew rapidly from its launch up until 2015, when it reached its highest number of listings. In 2016 and 2017, this growth slowed down because cities began enforcing stricter local rules. Although the platform started to recover and grow again over the next two years, its progress was suddenly stopped in 2020 by the COVID-19 pandemic.

Airbnb Market Trends & Customer Insights Dashboard

Market Share by City

- **Top Markets:** Paris, New York, and Sydney generate nearly **50%** of all platform listings and **48%** of total user reviews.
- **Market Leader:** Paris ranks highest in both listings and customer engagement.
- **Price Advantage:** High demand in these cities is largely driven by cost savings, with traditional hotel rates averaging twice the price of an Airbnb listing.

Ratings

Select the detail level

Overall Rating

Detailed Rating

Guests give the highest overall scores to **Mexico City** and **Rio de Janeiro**, while **Hong Kong** and **Istanbul** receive the lowest. Looking at the detailed breakdown, **Cleanliness** and **Value for Money** are consistently the weakest categories across most cities.

Airbnb Market Trends & Customer Insights Dashboard

Review Frequency

Seasonality

- **Paris and Rome** get the most reviews from April to August, while **New York** spikes in November and December.
- These trends show exactly when peak travel seasons happen, helping hosts change their pricing to make more money.

User Engagement Summary:

Analysis shows a highly concentrated baseline of user engagement, where **86%** of reviewers post a **single time**. Cumulatively, **99%** of the reviewing user base submits **3 or fewer reviews**, while a rare platform power-user peaks at **283 reviews**.

Trust

Trust Insights:

- **Fully Verified:** **66.9%** of hosts have both a profile picture and verified identity.
- **High Trust Level:** Nearly all hosts provide at least one form of identification.
- **Unverified & Anonymous:** Kept to a minimum at only **0.3%** of total profiles.

- ☐ Sydney

Average Price by Guest Capacity

- **Predictable Pricing Tiers:** For smaller groups of **1 to 6 guests**, rental **prices grow in a steady**, predictable line. This proves that standard property sizes follow a **highly stable market rate**.
- **The Large-Group Premium:** Major price spikes appear specifically at even capacities like **10, 12, and 14 guests**. This reveals a **highly profitable premium market** focused entirely on luxury villas and large group event stays.

Listings Share by room type

- **Entire Home Dominance:** "Entire place" listings completely dominate the platform at **65%**. This proves that the market is heavily driven by travelers who prioritize full privacy and larger spaces.
- **Flexible Budget Supply:** Private rooms hold a solid **31% market share**. This provides a strong balance to the ecosystem, offering excellent, cost-effective options for solo travelers.
